Professional Summary

Artificial Intelligence and Data Science student with a strong a background of data analyst field

and hands-on exposure to AI, data analytics, and UI/UX technologies. Skilled in Python, HTML, CSS, data visualization, pyspark, databricks,powerbi,excel with experience in developing AI-based and user-friendly solutions for real-world applications. Actively engaged in technical learning and industry sessions, demonstrating adaptability, teamwork, leadership, and a continuous learning mindset. Seeking opportunities as a Data Analyst and UI/UX Designer to contribute effectively in a professional environment.

Technical Skills

- Programming: Python, HTML, CSS,SQL,DATABRICKS,Pyspark
- Data & AI: Data Analysis, Data Visualization, Machine Learning (Basics), KNN Algorithm
- Tools & Platforms: Microsoft Excel, AWS, Google Cloud
- Concepts: Prompt Engineering, Data Processing, Cloud Fundamentals, UI/UX Design

Education

SRM Valliammai Engineering College Chennai, Tamil Nadu, India
B.Tech – Artificial Intelligence and Data Science
Semester (till 6th) – CGPA: 7.582026 – Present

MLM Mammallan Matric Higher Secondary School
Class XII – Percentage: 86%
Class X – Percentage: 79%

Certifications

- Brand Blitz (St. Joseph)
- Behind the Bug (Chennai Institute of Technology)
- Data Visualization (TATA Forage)
- Data Science & Analytics (HP LIFE)
- Google Cloud Data Transformation
- AWS Generative AI Foundations
- Google Analytics
- Cognos Analytics (IBM)

Projects

UI/UX Based Food Delivery Website March 2026 | Remote
- Developed a UI/UX interface webpage using Figma to create a user-friendly food delivery platform
- Designed an evaluation approach to improve user experience and interface accessibility

Legacy code System September 2026Remote
- Built an legacy code structure with the help of databricks pyspark postgresql reduce the wastage of money in the modification and enhance the traditional code structure
- Applied problem-solving techniques and real-world AI implementation methods

Cattle Diseases Detection System April 2026
- Developed an automated cattle disease detection concept using AI, computer vision, and IoT technologies
- Focused on early detection of diseases such as Foot-and-Mouth Disease (FMD) and Lumpy Skin Disease (LSD) with high prediction accuracy

Experience

AI & Analytics Industry Session November 2025
MR Groups and Company, Nandanam, Chennai, India

- Gained exposure to intelligent data applications and cloud-based workflows
- Explored practical use cases of data platforms in real-world scenarios

Leadership Experience

NSS Cadet

- Developed discipline, teamwork, communication, and leadership skills through NSS activities and social service programs
